INTERESTS

My research interests are (i) building real-time big data analytics systems and (ii) developing statistical and machine learning algorithms for smarter computational engines in those systems. During my PhD study, I developed algorithms for various data analytics applications including approximate query processing, data visualizations, searching in high-dimensional space. These algorithms were published in top-tier computer science conferences such as SIGMOD, VLDB, ICDE, and so on.

EDUCATION

University of Michigan, Ann Arbor

2016

Ph.D. Candidate, Computer Science and Engineering Thesis Advisors: Michael Cafarella and Barzan Mozafari

University of Michigan, Ann Arbor

2013

MS in Computer Science and Engineering

CGPA: 3.955/4.0

Seoul National University (SNU), Korea

2009

BS in Electrical Engineering

Note: The flagship university of South Korea
